My website's main features

I chose option two of the assignment designing a "Reference/Promotional Website". My website promotes Japan as a popular holiday destination as it is a place I am very interested in and would love to travel to one day.

The main features of my "Experience the Beauty of Japan" website are different pages that tell you about different aspects of Japan, namely about Japan, the food in Japan, culture, fun activities and travel tips.

The external resources I used as part of this assignment are links to publicly available information about Japan such as videos on YouTube, links to websites that tell you about the requirements needed to travel to Japan and images I found on the internet. All of the media I used is publicly available and attributed in my code.
